2 The Academy

3 The Course

5 The Modules

The Academy

21 Academy was founded in 2018. It is a Higher Education Institution licensed by the National Commission for Further and Higher Education with license number 2018-017.

The Academy has developed and delivered its own accredited courses such as Award in Company Law Fundamentals and Award in Anti Money Laundering & Funding of Terrorism.

It has also successfully delivered non-accredited courses such as the most sought-after course developed to date by the Academy, Course for Data Protection Officers/Leads. Other courses offered by the Academy include the 12 month long, Business & Human Resource Management course as well as the Digital Marketing one.

The Academy is proud to have designed an Undergraduate Diploma in Business Administration which has been accredited at MQF Level 5 with 60 ECTS.

21 Academy also offers custom made inhouse training programmes for businesses as well as delivers training programmes at its own premises in Naxxar and online.

The Academy has also been successfully delivering an annual conference on the General Data Protection Regulation (GDPR).

Students undertaking their studies at 21 Academy have recognised the cost-effectiveness of each programme and the flexibility as well as the expediency through which they are delivered.

The Academy's academic team consists of successful professionals who deliver the training on a part-time basis while at the same time gathering more experience practicing their profession. This helps to keep the training deliverables continuously updated.

The campus is in the historic village of Naxxar which is quite centrally located in the island. It is just a 25 minute but ride to the capital city Valletta, in close proximity to Malta's business hubs and bordering the island's entertainment venues.

MINISTRY FOR EDUCATION AND EMPLOYMENT

MQF MALTA QUALIFICATIONS FRAMEWORK

Undergraduate Diploma in Business Administration

- MQF Level 5
- 60 ECTS
- 300 contact hours
- 6 modules + Research Project

Modules

- Creating a Business
- Financial Analysis
- Marketing and Research
- Strategic Management
- Human Resource Management
- Managing data and its implications

Entry Requirements

- At least a matriculation certification (MQF Level 4) or A Level equivalent with more than 2 years' work experience.
- Students hailing from a non-majority English-speaking country. Either a minimum of level B2 in CEFR or IELTS level 6 in each component.

Methods of Assessment

Assessment will be based on in class presentations following group work, self assessment questionnaires, reflective notes, assignments, and a final research project.

This course is suitable for

- Students seeking knowledge and achievement in a formal Business Administration qualification.
- Students seeking to develop skills and critical thinking in business administration
- Employees seeking a qualification for their personal and professional development;
- Employees seeking job progression in administrative or senior management; OR
- Individuals interested in starting their own business.

This Level 5 Diploma in Business Administration assists student in developing abilities, skills and understanding to prepare them with the necessary knowledge and talents to become an effective strategic administrator, manager and leader. Thus, successful students may seek a career in:

- Business ownership
- Human Resources
- Sales and Marketing

Students will be guided through a series of lectures for each module and will also be exposed to resources in order to prepare themselves for discussions, presentations as well as presenting mock reports during lectures, and to continue furthering their research thereafter.

Lectures will cover different aspects of Business Administration according to the particular module. This shall include analysis of case studies, tackling of fictitious day to day business situations, in order for participants to be able to evaluate and put into practice what they are being taught during the lectures and what they find out through their own research.

Delivery will be carried out using presentations prepared by the lecturers as well as audio visual material. At the end of each module participants will work in groups to prepare a presentation on different scenarios themselves.

When possible, participants will also be addressed by experienced Business Administrators to share their experiences with the students.

Creating a Business

ECTS 8

The module focuses on the basics of entrepreneurship, underlining the contexts, the changing aspects as well as the engaged methodologies to create a fresh, and possibly innovative, undertakings. Moreover, participants are exposed to theories and strategies that are important to develop an effective and competitive business model.

Financial Analysis

ECTS 8

This module serves as an introduction to the processes of evaluating businesses, projects, budgets, and other finance-related operations to establish their suitability and performance. Students will learn to evaluate whether an enterprise is stable, solvent, liquid, or profitable enough to warrant a monetary investment or ask for a loan. The most common types of financial analysis performed by professionals will be covered during this module.

Marketing and Research

ECTS 8

Students are introduced to the basic models of marketing and understand its purpose in today's business environment. The principal theories and practices of marketing will be discussed. Participants will be exposed to how marketing builds value to the organisation and the clients.

The overall exposition of marketing research principles and basics of market research practices will be introduced. Students will also go through and distinguish between qualitative and quantitative data and how the respective data is gathered and analysed.

Managing data and its implications

ECTS 8

In this module, participants will study common data management tools used in business, most of which process personal data. Throughout this module students will come across different tools used by different departments within an organisation such as the HR, Marketing as well as the IT department and go to the pros and cons of such tools. Awareness on the implications of the use of personal data is raised and participants are exposed to data privacy legislation such as the GDPR.

Strategic Management

ECTS 8

This module will provide the students with a comprehensive framework for understanding the responsibility and purposes of Strategic Management inside modern-day business organisations. They will understand how different entities formulate, implement, and evaluate strategies and how they consider the strategic alternatives available to them. They will also be provided with a framework and context within which knowledge acquired across the course may be combined with new strategic-management techniques and how this may be integrated to outline the future prospective direction of different businesses.

Human Resource Management

ECTS 8

This module introduces the management of an entity's workforce through the planning and application of effective human resources policies and procedures. Current issues faced by companies as well as common practices are examined. It delves in a variety of topics which will include, the need for human resources management and its rising professionalism; human resource planning including job design and analysis; recruitment and selection; motivation and compensation; performance management; employee development; and employee relations.

Research Project

ECTS 12

This module is intended to offer students the opportunity of working on a supervised research project and to integrate and/or develop aspect/s of their previous learning experience throughout the preceding modules.

Students will be asked to come up with a research proposal on a, possibly innovative, business idea to fill in a gap in the market resulting from daily challenges they come across either in their personal or work environments. Eco friendly ideas and those making use of alternative energy will be encouraged though not a must.

Once the submitted idea is approved students will have to plan, design and research, the business' operations, marketing strategies, a five-year financial plan as well as its human resource strategy.

During both the research stage as well as the drafting of the long essay, students will be in continuous touch with their tutor/s who will assist them throughout the whole project's cycle.
