2 The Academy

3 The Course

5 The Modules

The Academy

21 Academy was founded in 2018. It is a Higher Education Institution licensed by the National Commission for Further and Higher Education with license number 2018-017.

The Academy has developed and delivered its own accredited courses such as Award in Company Law Fundamentals and Award in Anti Money Laundering & Funding of Terrorism.

It has also successfully delivered non-accredited courses such as the most sought-after course developed to date by the Academy, Course for Data Protection Officers/Leads. Other courses offered by the Academy include the 12 month long, Business & Human Resource Management course as well as the Digital Marketing one.

The Academy is proud to have designed an Undergraduate Diploma in Business Administration which has been accredited at MQF Level 5 with 60 ECTS.

21 Academy also offers custom made inhouse training programmes for businesses as well as delivers training programmes at its own premises in Naxxar and online.

The Academy has also been successfully delivering an annual conference on the General Data Protection Regulation (GDPR).

Students undertaking their studies at 21 Academy have recognised the cost-effectiveness of each programme and the flexibility as well as the expediency through which they are delivered.

The Academy's academic team consists of successful professionals who deliver the training on a part-time basis while at the same time gathering more experience practicing their profession. This helps to keep the training deliverables continuously updated.

The campus is in the historic village of Naxxar which is quite centrally located in the island. It is just a 25 minute but ride to the capital city Valletta, in close proximity to Malta's business hubs and bordering the island's entertainment venues.

MINISTRY FOR EDUCATION AND EMPLOYMENT

Malta Further & Higher Education Authority

They will find themselves prepared to face the realm of communications that is increasingly dependent on the digital engagement between social actors in everyday markets.

Students who successfully complete the study programme will also be competent in copyright ethics, ability to create digital content and utilise editing tools to create, edit and manipulate that content.

Marketing & Research

ECTS 8

The module introduces the students to the basic models of marketing and explains its purpose in today's business environment. Students will discuss the principal theories and practices of marketing and understand how marketing builds value to the organisation and the clients.

Students will also be introduced to the overall exposition of marketing research principles and basics of market research practices. Students will also go through and distinguish between qualitative and quantitative data and how the respective data is gathered and analysed.

Digital Marketing Basics

ECTS 8

A detailed explainer of how digital marketing opportunities, enhanced by technology integrate into traditional marketing. Students will be exposed to all Digital Marketing Channels and will be guided on how to create a Digital Marketing Plan. The course will delve into ways how content is managed by marketeers and will demonstrate how to create and analyse Target Groups. In this module, students will be exposed to Web analytics and understand how this works.

Basics of Search Engine Optimisation & Content Creation in CRM

ECTS 8

This module will offer an understanding of Search Engine Optimization (SEO) and the techniques revolving around skilful methods used by digital marketers to optimize content at a minimal possible cost. Participants will also acquire an overview of web creation and content adaptation for effective digital marketing penetration, including best use of content techniques for customer relationship management.

Social Media Marketing & Digital Advertising

ECTS 8

The module will also offer a comprehensive description of the digital advertising platforms. It exposes the power of social media in the digital world. Students will learn how to create Facebook pages, administer the Facebook Business Suite, Ads Manager, and how to integrate Instagram with Facebook.

Students will learn how to plan and execute a digital marketing budget for social media adverts taking into consideration a broad social media mix such as Twitter, You Tube, and Tik Tok. Participants will also learn how to manage digital advertising budgets according to engagement and results.

Corporate Digital Marketing

ECTS 8

This module will branch into the corporate world and the role digital marketing plays in medium to large business groups. It starts with an insight into what is required by a marketer when handling a corporate account and the benefits, pitfalls and techniques operated within digital marketing. Students will learn how to use LinkedIn and the networking power it possesses. Participants will understand the difference in the tone of voice between corporate platforms such as LinkedIn and other social media platforms such as Facebook. Participants will learn that head-hunting and job opportunities on corporate platforms like LinkedIn offer marketing opportunities that go beyond recruitment.

Participants will learn the basics of Customer Relations Management and the tools used to extract data and target potential clients for business growth, including email marketing to communicate with their intended audience.

Managing data and its implications

ECTS 8

An organisation's most valuable asset is often its data, but careful management is required to ensure the maximum benefit is achieved.

In this unit, participants will study common data management tools used in business, most of which process personal data. Throughout this module students will be exposed to different tools used by different departments within an organisation such as the HR, Marketing as well as the IT department and go to the pros and cons of such tools.

Contemporarily students will be made aware of the implications of the use of personal data and exposed to data privacy legislation such as the GDPR, and the e-Privacy Directive and the implications of such legislation and regulation on the respective departments.

Research Project

ECTS 12

This module is intended to offer students the opportunity of working on a supervised research project and to integrate and/or develop aspect/s of their previous learning experience throughout the preceding modules.

Students will be asked to come up with a research proposal on a, possibly innovative, business idea to fill in a gap in the market resulting from daily challenges they come across either in their personal or work environments. Eco friendly ideas and those making use of alternative energy will be encouraged though not a must.

Once the submitted idea is approved students will have to plan, design and research, the business' operations, marketing strategies, a five-year financial plan as well as its human resource strategy.

During both the research stage as well as the drafting of the long essay, students will be in continuous touch with their tutor/s who will assist them throughout the whole project's cycle.
